-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Drawings***

The proposed correction to the drawings filed January 7, 2005 has been approved.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by Masters et al (5788250). Note the bezel assembly (30), stem (28), tracks (36, 56), upper cross member (18), and teeth (53).

### ***Response to Amendment/Arguments***

Applicant's response filed January 7, 2005 has been fully considered. Remaining issues are described, above. Arguments regarding claim 15 are not persuasive. Applicant argues that the helical head restraint of claim 15 is not disclosed or suggested by Masters et al (5788250). It is noted that claim 15, as amended does not require the head restraint to be helical. Applicant argues that Masters et al merely discloses a

tubular bushing with an outer sleeve and an inner sleeve with a head portion, wherein the inner sleeve is aligned axially with the outer sleeve during insertion into the outer sleeve, and as such, the head portion is aligned with the axis of the outer sleeve when the inner sleeve is inserted into the outer sleeve. In Masters et al, the tubular bushing (26) represents the head restraint guide. Outer sleeve (30) represents the bezel assembly, and inner sleeve (28) represents the stem. The bezel assembly can be aligned axially at any point after the teeth (53) reaches a point adjacent to the upper end (45) of the tracks (36) and/or the projection (58) reaches a point adjacent to the track (56). Applicant argues that the head portion is disposed at a zero degree angle with respect to the outer sleeve when the inner sleeve is inserted into the outer sleeve, and that Masters et al fails to disclose a stem with tracks adapted to guide installation of a bezel assembly at a positive angle relative to the stem. Figure 3 shows outer sleeve (30) disposed at a zero degree angle, and bezel assembly (28) at a positive angle. Figure 4 shows both the outer sleeve and the bezel assembly at the positive angle. Note that the outer sleeve can be inserted, rotated, and aligned by way of the tracks such that the orientation shown in Figure 4 is achieved. Masters et al has been properly applied to claim 15. Upon reconsideration of the Masters et al, as it relates to claim 17, the rejection of claim 17 has been withdrawn.

***Allowable Subject Matter***

Claims 1-14 are allowed.

Art Unit: 3636

Claim 17 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

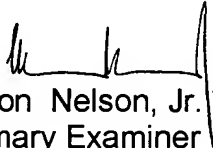

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
